

Refrigerator/Freezer Pick Up Requirements

1. The rebate process starts by submitting a receipt for an Energy Star Replacement of an older refrigerator/freezer (unit) to the Marketing Department at Sawnee EMC.
2. The rebate only applies to (1) replacement unit; that is a second refrigerator or freezer, and is **not** the primary refrigerator in the home (I.e. replacement of the refrigerator in the main kitchen, when that is the only refrigerator in the home, does not qualify).
3. Sawnee EMC Personnel will call to schedule a pickup time.
4. The unit being replaced/picked up must be over 10 years old.
5. The unit must be in working order and cold at time of pickup.
6. **The unit must be easily accessible to load:**
 - a. The unit has to be ready to load, at a driveway accessible garage, or basement door.
 - b. Sawnee personnel cannot move a unit through a home.
 - c. Sawnee personnel cannot drive through a yard to pick up a unit.
7. If any physical damage to a member's property is possible, Sawnee personnel reserve the right to not remove the unit.
8. New Energy Star unit must be on site at time of pickup. Sawnee personnel will have to visually verify this unit while on site.
9. New Energy Star unit must be purchased between January 1st and December 31st, of the current calendar year.
