

Level-2 Charger Rebate Requirements

A one-time \$200 bill credit per Sawnee EMC member* may be issued for the installation of a level-2 charger if the following requirements are met:

1. The car using the charger must be total electric
2. Must be purchased and installed in 2023 or after
3. Must be a 240-volt, Level-2 charger, capable of 40 amps or greater output
4. Portable units do not qualify for rebate
5. The charger must be UL or ETL listed
6. The Sawnee EMC account (meter) to which the charger is being connected must be billed under one of Sawnee's time based rate schedules: [Residential Time of Use \(TU\)](#), [Critical Peak Pricing \(CPPR\)](#), or [Plug in Electric Vehicle \(PEV\)](#)
 - The account must remain on the rate schedule for 12 consecutive months
 - Requesting a rate change prior to 12 months billing on the rate shall result in rate adjustments for previous bills, as well as a \$200 "rebate recall fee" being applied back to the account
7. The following required documents are submitted:
 - Receipt for the purchase of the Level-2 charger
 - Specification sheet for the installed charger
8. Charger cannot be standard equipment provided with vehicle from manufacturer
 - Must be an upgrade to standard equipment at additional cost
9. A Sawnee EMC Representative shall visually verify after the charger is installed

Please submit the required documents to marketing@sawnee.com and include the following:

- Name on Sawnee EMC Account
- Account Number
- Service Address
- Contact Phone Number

An Energy Services Representative will contact you to schedule a verification appointment

*Only one (1) rebate issued per location, regardless of the number of chargers installed
